

# Photography backgrounds and locations

## Background

You can create a photo using a variety of backgrounds. First consider what kind of tone or story you are telling – drama, space, fantasy, adventure – and then have a look around your house to see what you think would work well.

You can also create your own background by creating a drawing, or even head outside and use your garden for an authentic "jungle look"!

## Using your garden as a location

## Use every day furniture like a bookshelf!

# Photography backgrounds and locations

Using sheets, pillows or other household items as the set

Use an existing LEGO build

You'd be surprised what can work!
